

Team Information (Team Not Parx):

1. Shreyas Rao, 1009092955, shreyas.rao@mail.utoronto.ca

About Me:

Hello, my name is Shreyas Rao. I am a second-year computer science specialist at University of Toronto Scarborough. On the technical side, I am interested in full stack application development, devops, product and cloud engineering. Currently, I am part of the Google Developer Student Club at UTSC, where I helped with club events and upcoming hackathon! I am also a course representative and technology associate in the Association of Mathematics and Computer Science Students where I have held final course review seminars to over 150 students and contributed to maintaining the organization's website. In my free time, I enjoy playing various sports such as volleyball, badminton, and tennis. I was also a member of the UTSC volleyball team where we won the Fall 2022 Intramural Championships. Additionally, I like to read books and go biking.

2. Dmitriy Prokopchuk, 1007650622, dmitriy.prokopchuk@mail.utoronto.ca

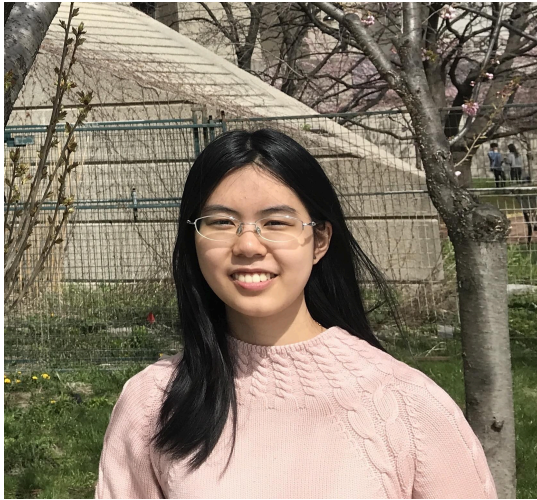

About Me:

Hi! My name is Dmitriy Prokopchuk, and I'm a 3rd year CS Specialist and Pearson Scholar at University of Toronto Scarborough. Currently I'm a Research Assistant at the Computational Social Science Lab at UofT, where I'm leading the backend development of a platform for collecting Machine Learning research data for the Maia Chess AI

project. I've previously interned at RBC and PointClickCare, both of which focused on backend API development with Java and Springboot. I'm also part of the Google Developer Student Club at UTSC, where I've helped with the organization of various events, including an upcoming hackathon! Generally speaking, I'm super passionate about backend development because of the complexities it offers beyond just implementing code, especially in terms of building large systems that scale, interact, and remain secure. In my spare time, I'm a big basketball fan and am the captain of a recreational basketball team at UTSC!

3. Cindy Ji, 1006718223, cindy.ji@mail.utoronto.ca

About Me:

Hi, my name is Cindy Ji and I am currently a fourth-year student studying computer science at UTSC. I have completed two internships at Scotiabank, where my responsibilities included enhancing the bank's internal search engine and developing chatbots using Google PaLM technology. In my spare time, I enjoy journaling, swimming, and reading I Ching, a Chinese philosophy book on changes. I like how it is able to capture and articulate life's patterns with remarkable simplicity and elegance.

4. Alankrit Verma, 1008830838, alankrit.verma@mail.utoronto.ca

About Me:

Alankrit Verma, a Computer Science and Entrepreneurship student at the University of Toronto, is deeply involved in software engineering and machine learning. My research focuses on algorithmic bias in social media and applying machine learning to Reddit data. As Vice-President of the Departmental Student Association and Vice Lead at the Google Developer Student Club, I've played a key role in organizing Canada's largest Generative AI hackathon.

My projects, "Paper Vision" and "The Course," have not only garnered accolades but also facilitated a collaboration with the university. In my role as a Teaching Assistant, I lead tutorials and lectures on computer science fundamentals for over 80 students, emphasizing the importance of mentorship and educational excellence in the tech community.

5. Katarina Sotic, 1007909122, katarina.sotic@mail.utoronto.ca

Photo:

About Me:

Hi, my name is Katarina Sotic and I am currently in my 3rd year specializing in Software Engineering at the University of Toronto Scarborough, originally from Belgrade, Serbia. Aside from studying, I am also a part-time Full Stack Developer at Temerity Analytics, where I have worked for almost 2 years, mainly focusing on frontend development with Angular, UI/UX design, as well as Python and Django backend development. In my spare time, I enjoy playing the piano, as well as singing, and I am a big enjoyer of skiing during the winter months!

6. Connor Musson, 1007925355, connor.musson@mail.utoronto.ca

About Me:

Hi, my name is Connor Musson. I am a third year Computer Science Specialist student at the University of Toronto Scarborough. I previously worked at AutoTrader as an iOS Engineer, and am interested in pursuing a career in full stack development. I enjoy being active and playing different sports, such as basketball. Currently, I am a basketball coach for MUMBA, where I teach hundreds of kids each week how to play basketball. This is a passion of mine, and something I intend to continue doing in the future.
